## Tips for Successful Maintenance of Altro Whiterock PVC Walling, Ceiling and Doorsets

- 1. Develop a regular cleaning programme suited to the usage and traffic of the area** – heavy traffic or highly visible areas, or locations with rigorous hygiene requirements, need to be cleaned more often than areas which are seldom used, or where appearance is less important. A weekly cleaning programme is the minimum recommended.
- 2. Use recommended cleaning chemicals** – use only recommended cleaning liquids, their equivalents or sterilising solutions in the correct concentration. Do not mix cleaning chemicals together, and always follow the manufacturer's instructions.
- 3. Remove scuff marks and heavy soiling regularly** – marks and soiling should be removed more often than the maintenance programme, e.g. daily. Never use abrasive pads or cleaners.
- 4. Hot water lances can cause damage** - use with care and never closer than 600mm or above maximum temperature recommendations.

High quality cleaning chemicals ensure efficient maintenance and represent only a small proportion of maintenance costs. The following suppliers offer excellent products:
